A History of Final Exercises at the University of Virginia

So astute was Mr. Jefferson in determining the basic educational policy for the University of Virginia that the policy has seen very little change in the University's 206-year history. The colorful ceremony you will see today, however, would not have been held under Thomas Jefferson's original plan, which did not provide for degrees and diplomas. Although the early students of the University were highly respected for their knowledge, some of them petitioned the Board of Visitors for diplomas to improve their opportunities for employment.

Out of deference to the founder, the Board took no action on these requests during Jefferson's lifetime, but fifteen months after his death, it changed the policy and directed that plans be laid for the first "Public Day" (commencement). In July 1829, the first Public Day was held in the Dome Room of the Rotunda. The program was very long, and it included orations by students. By 1848, the program began with a procession led by students and involved a single address by a prominent person.

Public Day was held in the Dome Room until the Rotunda annex was completed in 1853. It was then held in the public hall of the annex until the Rotunda and the annex burned in 1895. When Cabell Hall was completed in 1898, the Public Day programs were held in its auditorium. President Alderman's inauguration in 1905 brought about the more formal procession as seen today. It is now led by a faculty grand marshal.

When the McIntire Amphitheatre was completed in 1921, it became the site for the final exercises. A sudden drenching rainstorm disrupted the 1949 ceremony, sending the soaked graduates and guests into any shelter they could find. The threat of sudden storms and the increased number of graduates caused President Colgate Darden to declare that the 1952 ceremony would be the last to be held in the amphitheatre. Since then, Finals have been held on the Lawn except in bad weather.

Even when the ceremonies were held in the amphitheatre, the participants marched from the Rotunda, down the Lawn to the site of the ceremony. Students have long considered it a high privilege to have the opportunity to walk down the Lawn at Finals, and today's students place an even greater importance on this privilege. So important to many of them is the ceremonial walk down the Lawn, that a number of students, cheated out of a ceremony on the Lawn by bad weather, "confirm" their graduation by processing down the Lawn after Finals.

Through 1961, the president conferred the degrees and handed each recipient a diploma. By this time, graduates numbered in the thousands. The ceremony had become much too lengthy and the logistics too complex. Beginning in 1962 and continuing today, degrees are conferred in a main ceremony by the president. Degree recipients and their guests then reassemble later in school and department ceremonies.

The Academic Procession

The Procession

The academic procession is led by the grand marshal of the University bearing the official silver and ebony mace. Most of the processioners wear the academic costume accepted by a majority of the principal institutions of higher learning in the United States, though certain academic officials, such as the rector of the University, wear particular costumes indicative of current office. The processional order is listed below.

The Gown

The processional gown is usually black; the design of the sleeves denotes the type of degree being conferred. The bachelor's sleeve is long and pointed. The master's sleeve has squared ends, with the arc of a circle near the bottom and a slit for the arm near the elbow. The doctoral sleeve is bell-shaped with three velvet bars. The doctoral robe has full-length velvet panels in front, either black or a color that symbolizes the wearer's field of learning.

The Hood

A separate ornamental fold hangs down the back of the gown, and its lining carries the colors of the college or university granting the degree (for the University of Virginia, orange and blue). An outside band of velvet varies in width according to the degree: two inches for bachelor's degree, three for the master's, and five for the doctorate. The color of the band and other velvet on the doctoral hood symbolizes the field of learning (such as dark blue for philosophy). The length of the hood also varies with the level of the degree: bachelor's, three feet; master's, three and one-half feet; and doctorate, four feet. Bachelor's and master's degree candidates often do not wear their hoods.

The Cap

The cap is usually the black mortarboard, decorated with a tassel. Gold tassels may be worn by holders of doctoral degrees. Generally, the colors of the tassels represent the principal fields of learning and are described below.

Michael F. Suarez, S.J.

Michael F. Suarez, S.J., has served as Director of Rare Book School and Professor of English at the University of Virginia since 2009. He also holds appointments as University Professor and Honorary Curator of Special Collections. A distinguished scholar of eighteenth-century English literature, bibliography, and book history, he previously held faculty positions at Fordham University, where he was the J. A. Kavanaugh Professor of English, and Oxford University, where he was Fellow and Tutor in English.

A Jesuit priest, Suarez holds seven degrees, four of them from Oxford. A Phi Beta Kappa graduate of Bucknell University, he triple-majored in biology, English, and sociology, played lacrosse, was president of the student government, founded a service fraternity, and was named National Collegiate Leader of the Year by Omicron Delta Kappa. A Marshall Scholar at Oxford, he graduated first in his class and won the Sir Roger Newdigate Prize for Poetry.

After earning master of divinity and master of theology degrees, both with distinction, from the Weston Jesuit School of Theology in Cambridge, Massachusetts, Suarez was ordained in 1994. In addition to his academic commitments, he has variously worked at a home for at-risk women in the Bronx, at a L'Arche community for developmentally disabled adults in California, and as a prison chaplain at Rikers Island.

In 2015, Suarez delivered the Lyell Lectures in Bibliography at the University of Oxford and in 2021 gave the Rosenbach Lectures in Bibliography at the University of Pennsylvania. The following year Suarez was the inaugural guest professor in the University of Chicago Visiting Scholar Program in Paleography and the History of the Book. In 2023, he was elected Fellow of the Society of Antiquaries (London).

Under his leadership, Rare Book School at the University of Virginia has risen to international prominence as the world's leading institute for the study of manuscripts, printed books, and born-digital materials. The White House nominated him to the National Council on the Humanities and his research has been supported by prestigious fellowships from the Radcliffe Institute for Advanced Study at Harvard University, the National Endowment for the Humanities, the American Council of Learned Societies, and the Folger Shakespeare Library. The *Times Literary Supplement* has named three of his scholarly projects as "Books of the Year."

Cedric Bernard Rucker

Cedric Bernard Rucker, a 1984 graduate of the University of Virginia, currently serves as Special Advisor to the Vice President and Chief Student Affairs Officer, a role he assumed in March 2025 after serving as Interim Senior Associate Vice President for Student Affairs and Dean of Students since August 2023. He holds a bachelor of arts degree from Mary Washington College and a master of arts from the University of Virginia. His research focused on institutions, education, and religious movements. He also participated in a Foreign Study Exchange in Argentina, Brazil, and Paraguay, exploring educational exchange in language, culture, economics, government, education, and geography.

Mr. Rucker began his career at UVA as Assistant Dean of Admission in 1983, where he helped recruit and enroll top students, forging strong ties between student organizations and the Office of Admission. In 1989, he returned to his undergraduate alma mater, the University of Mary Washington, serving for ten years as Associate Dean for Student Activities and Director of the Woodard Campus Center. In 1999, Mr. Rucker was promoted to Associate Vice President for Student Affairs and Dean of Student Life until his retirement from the University of Mary Washington in 2022. In recognition of his exceptional service, the University of Mary Washington renamed its University Center in his honor.

Throughout his career, Mr. Rucker has provided visionary leadership in student affairs, fostering inclusive, engaged campus communities. At UVA, he helped guide the Division of Student Affairs through a time of growth and transformation. Frequently recognized for his contributions, he is a member of the Raven Society and a recipient of the Z Society's Pale Z Award.

A committed educator, he taught sociology and gender studies courses at the University of Mary Washington and remained deeply invested in student development. Beyond academia, Mr. Rucker has held public service roles with the Commonwealth of Virginia as a member of the Board of Medicine; the Commonwealth Transportation Board, and the House Ethics Advisory Panel. His many accolades include the "Living Legacy Award" from Richmond Public Schools and the "Eagle Beyond Compare Award" from the University of Mary Washington.

Originally planning to join the Peace Corps post-retirement, Mr. Rucker returned to the University instead, drawn by his deep commitment to student support. He plans to retire in summer 2025, shifting focus to family time and global travel – having already visited 116 countries.

Doctors of Philosophy

BIOMEDICAL ENGINEERING

Taylor Eggertsen
Dissertation: *Systems Pharmacology Approaches Identify Drugs and Mechanisms That Regulate Cardiomyocyte Growth*

Katsiarina Morgaenko
Dissertation: *A Novel Ex Vivo Model of Breast Cancer Cell Invasion in Live Lymph Node Tissue*

Colleen Ann Roosa
Dissertation: *Design of an Immunomodulatory Microporous Annealed Particle (MAP) Scaffold as a Platform for Delivery of Insulin-Producing Cells*

Jack Whitewolf
Dissertation: *Engineering Highly Porous, Fiber-Reinforced Granular Hydrogel Scaffolds*

Yanjun Xie
Dissertation: *Ultrasonic Imaging and Therapy Using Microbubbles for Deep Vein Thrombosis*

CHEMICAL ENGINEERING

Rhea Martha Braun
Dissertation: *Developing Agent-Based Models for Bacterial Chemotaxis with Sonification-Aided Data Collection*

Zixian Cui
Dissertation: *Engineering Molecular Architectures of Antimicrobial Peptide (AMP)-Polymer Conjugates*

Rachel Ann Mazur
Dissertation: *Electrospun Fiber Cues Influence Differentiation of Oligodendrocyte Progenitor Cells and Neural Stem Cells in 3D Hyaluronic Acid Hydrogels*

Toriana Vigil
Dissertation: *Investigating Biomineralization and Other Geobiological Challenges*

CIVIL ENGINEERING

Tomeka Janai Carroll
Dissertation: *Transforming Education: Exploring DEIJ Implementation in Curricula Through Professor Perspectives*

David Ricardo Gutierrez Serrano
Dissertation: *A Values-Based Approach to Sustainability in Construction: Exploring the Influence of Personal Values on Socially Relevant Construction Decisions*

COMPUTER ENGINEERING

Shijie Gao
Dissertation: *Transfer Learning Methods for Prediction, Replanning, and Adaptations of Autonomous Mobile Robots Under Degraded Conditions*

Victor Ariel Leal Sobral
Dissertation: *Enabling Self-Powered Internet of Things with Integrated Cyber-Physical Modeling and Deployment Tools*

COMPUTER SCIENCE

Zheng Chai
Dissertation: *Towards Efficient Distributed Machine Learning Systems*

Jiechao Gao
Dissertation: *Towards Private and Accurate IoT Applications*

Carl Hildebrandt
Dissertation: *Autonomous System Testing: Incorporating Physical Environments and Physical Semantics*

[1] Distinguished Majors Program

William Edward Leeson
Dissertation: *Learning to Improve Program Analysis Using Graph Representations*

Anshuman Suri
Dissertation: *Inference Privacy in Machine Learning*

Lahiru Nuwan Senarathna Wijayasingha
Dissertation: *Fundamental Algorithmic Solutions Informed by Cognitive Assistance for First Responders*

ELECTRICAL ENGINEERING

Yushun Dong
Dissertation: *Algorithmic Fairness in Graph Machine Learning: Explanation, Optimization, and Certification*

Jacob Daniel Higgins
Dissertation: *Occlusion-Aware Navigation of Autonomous Mobile Robots in Unknown, Unstructured, and Dynamic Environments*

Md Golam Morshed
Dissertation: *Energy Barrier Engineering in Nanomagnetic Devices for Unconventional Computing*

Shuman Sun
Dissertation: *Soliton Microcombs for Micro/MM-Wave Generation on Integrated Photonics Platforms*

Kun Yang
Dissertation: *Towards Practical Reinforcement Learning Designs for Wireless Network Optimization*

Xugui Zhou
Dissertation: *Context-Aware Assurance in Cyber-Physical Systems*

MECHANICAL AND AEROSPACE ENGINEERING

Jamison Lee Bartlett
Dissertation: *In Situ Non-Contact Process Monitoring for Quality Control in Selective Laser Melting*

Kenneth Robert Brown
Dissertation: *Transforming Ultra-High Molecular Weight Polyethylene Fibers: Sustainable Production Methods, Nanocomposites, and Carbon Fibers*

Ruoxi Chen
Dissertation: *Nanocarbon-Enabled High-Performance Energy Storage and Decarbonization*

Jiajun He
Dissertation: *Sustainable Nanocarbons for Energy Storage and Decarbonization*

Sophia Tushak
Dissertation: *Development of Lumbar Spine Injury Risk Prediction Tools for Physical and Virtual Human Surrogates in Frontal Motor Vehicle Crashes*

SYSTEMS ENGINEERING

Abdul Jawad Alami
Dissertation: *Improving Explainable AI (XAI) Integration in High-Stakes Environments: Examining the Effect of Workload, Task Priority, and Training on XAI Use*

Harsh Anand
Dissertation: *Examination of Community Responses to Hurricane Evacuation Orders Using High-Fidelity Mobility Data*

Lauren Marie Bramblett
Dissertation: *Foundations of Epistemic Planning for Collaborative Multi-Robot Systems*

DeAndre Johnson
Dissertation: *Theoretical Framework for Risk Factors and Safety Factors in Systems Modeling Language*

Navreet Kaur
Dissertation: *Towards Improving Medication Adherence Leveraging Personalized, Theory-Informed Models*

Hossein KavianiHamedani
Dissertation: *Designing Robust Control Rules for Stochastic Engineered Systems*

Shashwat Kumar
Dissertation: *Shape-Based Methods for Motor Function Analysis*

Merat Rezaei
Dissertation: *Computational Modeling of Mechanosensitive Neuron Populations in the Human Tongue During Oral Processing*

The Good Old Song

That good old song of Wah-hoo-wah,

We'll sing it o'er and o'er;

It cheers our hearts and warms our blood

To hear them shout and roar.

We come from old Virginia

Where all is bright and gay;

Let's all join hands and give a yell

For the dear old UVA.
